PROFESSIONAL PROFILE

Python Backend Developer with hands-on experience designing and shipping **production-grade systems** across logistics, healthcare, fintech, and enterprise domains. Core specialization in **Django · FastAPI · Django REST Framework** — building REST APIs, SaaS platforms, automation pipelines, and AI-powered backends that solve real business problems.

At iTracker (ICTSI — Porto do Rio de Janeiro), delivered 6 enterprise systems under production pressure — including an AI executive dashboard with **LLM/RAG pipeline**, a gate control platform serving multiple port sectors, and RPA bots automating financial workflows. Independently shipped 4 live products: a SaaS for freelancers (proflow.pro), a Django e-commerce with Mercado Pago, a full-stack CRM/TMS for transportation companies, and a corporate digital signage platform.

Practices: Clean Architecture · SOLID · DRY · RESTful API design · JWT auth · multi-tenant SaaS patterns · background tasks with Celery · real-time with WebSockets.

FEATURED PROJECTS

ProFlow — SaaS for Freelancers

LIVE

Intelligent SaaS platform to professionalize freelancers in Brazil. Integrated payments with escrow protection, AI-powered proposal generation (GPT-4), project management, identity verification (ProFlow Score), and an executive analytics dashboard.

 Live production SaaS with real clients · Integrated PWA

AgentesIA — Multi-Agent Business Consulting SaaS

AI · SaaS

SaaS platform that simulates an executive consulting team via 5 specialized AI agents working in parallel. Analyzes business problems from multiple perspectives, generates reports in PDF/PPTX, and supports multi-tenant organizations with freemium plans (Free, Pro, Enterprise).

Async multi-agent orchestration ·  Claude 3 (Anthropic) · Deployed Railway + Vercel

Oráculo — AI Strategic Decision Consultant

[AI · RAG · Python](#)

AI-powered strategic consultant with a full OpenRAG pipeline. Features a ChatGPT-style React interface, predictive analytics, executive dashboard, budget & goal management, and universal cloud data integration for logistics and commercial data.

OpenRAG stack: OpenSearch ·
Langflow · Docling — fully
containerized

[Python](#)[OpenRAG · LLM](#)[OpenSearch · Langflow](#)[React](#)[Docker](#)[REST API](#)[View on GitHub](#)

LogiFlow — Transportation SaaS CRM/TMS

[LIVE](#)

Enterprise SaaS for transportation companies. CRM + TMS + fleet management, fiscal document emission (CT-e/MDF-e via SEFAZ), real-time GPS tracking, ERP integrations (Omie, Bling, Tiny), multi-tenant architecture.

60–70% more affordable than
traditional enterprise TMS
solutions

PROFESSIONAL EXPERIENCE

Python Backend Developer

iTracker | ICTSI Group — Porto do Rio de Janeiro (Brazil's largest private port terminal)

Dec 2024 – Jan 2026

Sole developer responsible for designing, building, and deploying 6 production enterprise systems for port and logistics operations. Full ownership from architecture to deployment — Python, Django, FastAPI, Linux, Docker. Also integrated AI/LLM capabilities into the commercial analytics platform, and built RPA bots automating critical financial workflows.

SYSTEMS DESIGNED & DELIVERED

GPTracker — AI Commercial Analysis Platform

[Python](#) · [FastAPI](#) · [Streamlit](#) · [LLM/RAG \(GPT-4\)](#) · [PostgreSQL](#) · [Docker](#)

Executive dashboard with predictive analytics, budget management, and RAG-powered intelligent chat for data querying in natural language.

GateLog — Port Gate Control System

[Django 5.0](#) · [Django REST Framework](#) · [Vue.js 3](#) · [Vite](#) · [TailwindCSS](#) · [PostgreSQL](#) · [JWT](#)

Full entry/exit control system with multi-company management, RBAC, and JWT authentication — deployed and adopted across port sectors.

FlowTrack — Non-Conformance & Workflow System

[Python](#) · [Flask](#) · [PostgreSQL](#) · [JWT](#) · [Docker](#)

Multi-level approval workflow engine with configurable RBAC, immutable audit trail, driver/vehicle management, and live KPI dashboard with Excel/PDF export.

Digital Signage Platform — Corporate TV

[Python](#) · [Flask](#) · [React](#) · [WebSocket](#) · [Redis](#) · [FFmpeg](#) · [Chromecast](#) · [Prometheus](#)

Centralized digital signage platform with real-time WebSocket communication, automatic video compilation, multi-company support, and Prometheus metrics.

CargoSnap — Cargo Tracking Platform

[Python \(61%\)](#) · [JavaScript \(28%\)](#) · [PostgreSQL](#)

Port cargo management and tracking system with document workflows and operational reporting.

- ✓ Built RPA pipelines with Selenium + PyAutoGUI that **automated banking and financial processes**, replacing hours of daily manual work.
- ✓ Integrated LLM/RAG pipeline into GPTracker — enabling executives to query business data via natural language, replacing manual reporting cycles.
- ✓ Deployed and maintained all applications on **Linux (Ubuntu) + Nginx**; implemented Docker Compose for reproducible environments across all projects.
- ✓ Developed real-time fleet GPS tracking system with Telematics API integration — used by dispatch operators across multiple transportation clients.
- ✓ Designed microservices architecture enabling independent deployment of 4 integrated applications (CRM, Driver App, Client Portal, Institutional Site).

IT Manager & Python Developer

Oct 2023 – Jul 2024

RWE Telemedicina e Diagnósticos

Progressed rapidly from Helpdesk (Oct 2023) → IT Support Analyst (Nov 2023) → IT Manager (Jan 2024) within 3 months. Led the technical support, infrastructure, and IT governance teams while developing Python automation tools for internal process optimization. Responsible for infrastructure stability across Windows Server, Active Directory, VPN, and cloud services.
